

# free to win

## Escape from the prison of a negative mindset!

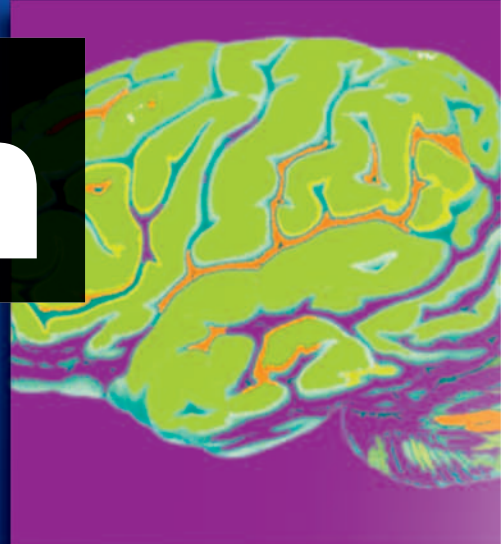

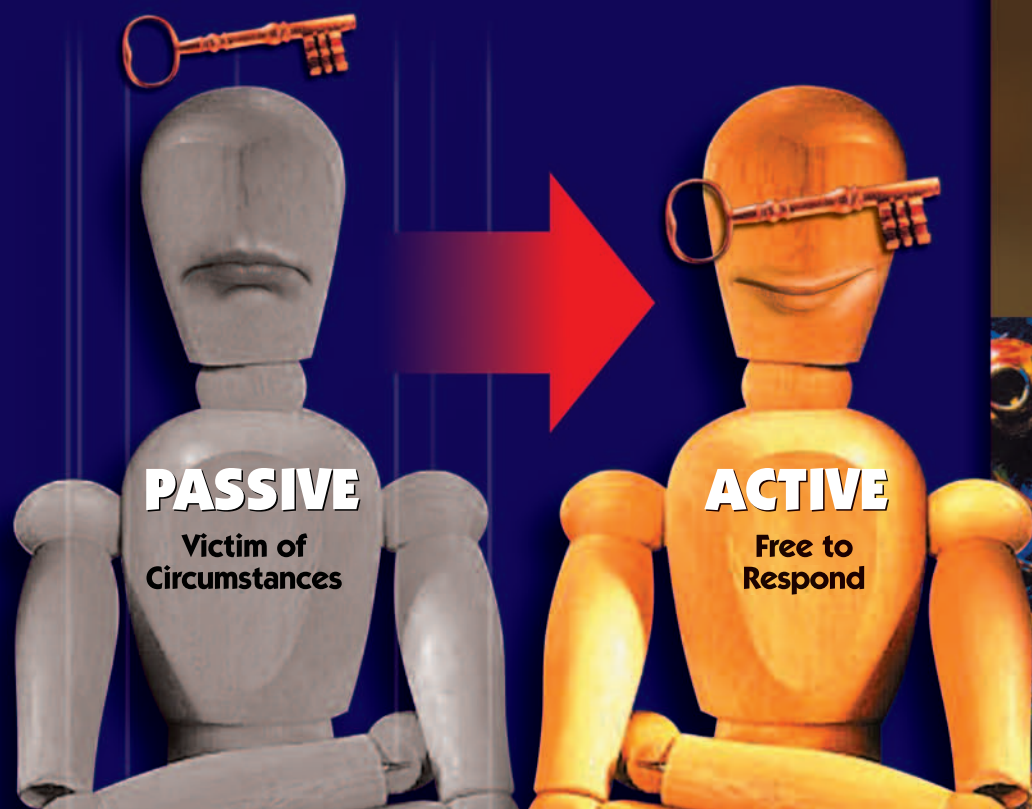

How do you foster optimism in these times of high stakes testing, high expectations, collective bargaining and the challenge of universal student success?

The key to taking responsibility for positive, future oriented change is within the reach of all teachers. Many, however, are of the mindset that they are victims of their environment and that the key to success and fulfillment is in the hands of someone else

**Free to win** is a program designed to facilitate:

- The **recognition of this losing mindset** and how continuous blaming and lack of taking ownership impairs the implementation of improvement strategies and the achievement of academic performance targets.
- How teachers and districts **fall back into the trap of negativity** during times of continuous change.
- The discovery of a winning mindset and how each teacher, administrator, support staff member has the individual **power to choose to win**.
- That winning teachers are able to **adapt and convert** continuous changes and challenges to **opportunities for success** in each school district.

The result: constructive mobilization of positive energy with teachers reconnecting with their innate ability to take charge of their own lives as well as the School District's vision.
